

VDAX MAKES BIG DATA USEFUL TO YOU

Agencies have more powerful Business Intelligence (BI), data science, and other advanced tools along with more data than ever before. However, getting the data ready for the tools still consumes about 80% of the effort. Data scientists, analysts, visualization experts, and others spend much more time prepping data than analyzing the results. VDAX changes the equation with a Data Fusion and AI service that turns raw data into useful information, intelligence, and knowledge.

VDAX helps:

- Leverage your current data tool sets making them more productive.
- Improve reliability with trusted data sets which are auto reconciled and continuously monitored for errors and anomalies.
- Augment your data science, advanced analytic, and visualization expertise.

VDAX can turn your data assets into useful information, intelligence and knowledge providing immediate value to your organization.

DECISION SUPPORT

- Finance, HR, Procurement, Performance Management, and other functional domains
- Support all data consumption modes:
 - Visualization
 - Dashboards
 - Predictive Analytics
 - Data Science
 - Interactive Reporting
- Enable both executive and operational decisioning

PROCESS ROBOTICS

- Transform both low and high complexity tasks for generating information and intelligence
- Automate the “last mile” of information supply chain and eliminate manual data wrangling required for analysis and reporting
- Maintain “Line-of-Sight” from visualizations back to the source data

DATA FUSION

- Produce Smart Data models which work with any BI and Data Science tools
- AI based harmonization makes data from disparate sources look as if it all came from a single seamless source
- Continuously identify and quantify impact of bad data

Premium Series*

VDAX Open Data Series

VDAX Open Data Edition converts publicly available federal data into meaningful information. Interactive information includes Federal:

- ▣ Budgets,
- ▣ Spending,
- ▣ Contracts,
- ▣ Grants,
- ▣ Positions, and
- ▣ Vendors.

VDAX validates and reconciles information according to DATA Act requirements for USASpending. Authoritative sources also include SAM, FPDS, OMB, DoD, and others. VDAX will increase its library as more open data is published under the OPEN Government Data Act.

Subscription - \$24.99 /mo

VDAX Premium Series

VDAX Premium Series works with all data, internal, external, as well as open. VDAX knowledge bases follow the Federal Integrated Business Framework (FIBF) for Federal Lines of Business:

- ▣ Financial Management
- ▣ Grants Management
- ▣ Human Capital
- ▣ Procurement
- ▣ Travel

VDAX models also support Program Office, Performance Management, and Compliance requirements.

The VDAX Premium Series also offers available data science, advanced analytic, visualization, and information engineering professional services.
