

Vintun Rapid “To-Be” Process Optimization

The Challenge – Begin with the end state in mind...but how?

- Leveraging VR2B process optimization model and framework allows organizations to clearly and efficiently design and build for success
- We do this by implementing a transformation framework that is laser focused on business analysis with agile collaboration, and change management covering the entire lifecycle

Business Analysis as a practice facilitates change management in an organization:

- Defines business needs (*problems or opportunities*) in collaboration with its stakeholders through strategy analysis and requirement engineering

How it works...the VR2B agile team:

- Conducts business process ‘as-is’ assessment
- Conducts a “To-Be” workshop
- Completes a gap-analysis review based on similar best practices; and proposes a ‘To-Be’ optimized process
- Delivers a description of the target line of business and relationships, dictionary of terms and documents, and process diagrams – all in pdf format
(*Microsoft Visio files optional*)

VR2B follows Business Process Modeling Best Practices when developing the ‘Process Scope’:

- Clearly define the scope of the Process
- Identify what each instance of your Process will represent
- Instances are discreet and identifiable
- Identify the potential alternative ways to trigger the Process
- Identify the potential alternative end states

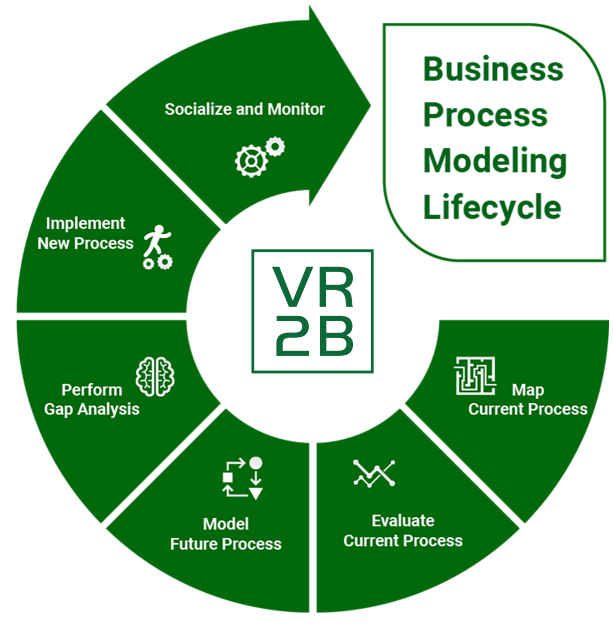

FEDERAL SECTOR CUSTOMERS

VR2B Process mapping is capable of supporting several important business goals:

- Business process improvement
- Training
- Process / workflow clarification
- Regulatory compliance
- Internal audit
- Role clarity (through responsibility assignment or RACI matrix)

OUR INDUSTRY PARTNER

Bizagi's industry leading platform for intelligent process automation connects people, applications, robots and information. As the most business friendly and flexible solution on the market, Bizagi enables true collaboration between business and IT, delivering faster adoption and success. Bizagi:

- Is an intelligent process automation platform.
- Enables true collaboration between Business & IT, delivering faster adoption and success.

Bizagi's digital business platform integrates with UiPath's connected Robotic Process Automation to provide a comprehensive business process management / RPA solution.
